## ABOUT US

- **Sukesh Industries Pvt. Ltd.** was established in the year 2011. We are professionally managed manufacturer, supplier & trader of superior quality Nonmetallic Mineral such as Calcite Powder, Dolomite Powder, Lime etc. which are widely used for their excellent metallurgical properties. Our mentor Mr. Padam Chand Jain has led us to the firm grounds of success with his in-depth industrial knowledge and years of experience. We have a team of experts who have relevant credentials and immense industry experience. Backing on their in-depth knowledge we have served to the varied needs of many clients across the world. Further we try to understand the requirements of our clients and process the minerals with the similar properties.
- The minerals we manufacture are best in terms of purity, micron sizes and whiteness and are available in different mesh and grades. Our products have gained wide acceptance all across the world because of which we have carved a niche for ourselves in the industry. It has further led us to our association with some top most organizations.
- Our company has state-of-the-art manufacturing facilities, qualified management and worldwide commercial network to deal with mining to micronizing of Minerals. We Sukesh Industries Pvt. Ltd., supply mineral demanded by our clients because of its superior quality. We provide our products at the most competitive prices along with reliable services. Since our establishment, we have achieved great success because we believe in providing best quality and customer satisfaction.
- We are Jaipur based manufacturing, supplying and trading industry and having manufacturing unit at Parbatsar & Kishangarh in Rajasthan (India). Sukesh Industries Pvt. Ltd. is a pioneer in the field of mineral processing and supply. Sukesh Industries Pvt. Ltd. has been playing stroke of excellence in the world of Mineral Powders. Leveraging on our expertise and experience we are offering high grades of Calcite powder, Dolomite powder, Lime & Bleaching Powder, Di Calcium Phosphate for various industry. In order to maintain good hold in the market, we consistently offer fine grade of mineral, which provide complete satisfaction to our customer. Apart from the qualitative range of mineral powder, we also conduct business with our principles and ethics that continuously help in the growth of our organization. Sukesh Industries Pvt. Ltd. ensures that material of very high purity is passed on to the customers and achieved highest customer satisfaction.

## CERTIFICATE OF TRUST

**Sukesh Industries Private Limited**  
Jaipur, Rajasthan

has been certified as a trusted member of IndiaMART

Following details of the company have been verified\*

Naam Hi Kafi Hai

# Calcium Carbonate Powder

We are engaged in processing high quality Natural Calcium Carbonate Powder that is a natural form of calcium carbonate. Our Natural Calcium Carbonate Mineral Powder is widely used in various industries like plastic, paint, rubber, Feed and soon. Also, we manufacture our White Natural Calcium Carbonate Powder under the best manufacturing conditions so that there is no compromise in their quality. Our Natural Calcium Carbonate powder can be availed at the most affordable prices possible.

# Precipitated Calcium Carbonate Powder

Precipitated calcium carbonate (PCC) is an **innovative product derived from lime**, which has many industrial applications. PCC is made by hydrating high-calcium quicklime and then reacting the resulting slurry, or “milk-of-lime”, with carbon dioxide.

# Precipitated Silica Powder

Precipitated silica is a synthetic form of silicon dioxide that is produced by precipitation from a solution containing silicate salts. It has a wide range of applications due to its unique physical and chemical properties.

# Dolomite Powder

We offer a highly versatile range of mineral Dolomite Powder which is used in various industries. The salient feature of our natural dolomite is its higher degree of purity, wet ability and whiteness. Our natural dolomite is fire resistive and solid. Long lasting life and stiffness is the strength of our mineral dolomite. We use best quality machines to ensure the quality of our mineral dolomite. We have carved a niche as one of the leading dolomite stone powder manufacturers in India.

# Marble Powder

We offer a highly versatile range of mineral MARBLE Powder which is used in various industries. The salient feature of our natural MARBLE is its higher degree of purity, wet ability and whiteness. Our natural MARBLE is fire resistive and solid. Long lasting life and stiffness is the strength of our mineral MARBLE . We use best quality machines to ensure the quality of our mineral MARBLE . We have carved a niche as one of the leading MARBLE stone powder manufacturers in India.

# Limestone Powder

We have surpassed the competition by processing best in class grade of Lime Stone Powder. Our offered limestone powder finds its application in various industries including agriculture, feed , paper, plastic, paint, rubber, feeds and construction. The offered powder is widely used for preparation of concrete in order to increase its bonding strength.

Available in varied weight sizes, we are providing this high quality lime stone powder at the best price in the industry.

# Soapstone Powder

We have an excellent range of Soapstone. A team of experienced workers takes full care of quality in production. Soapstone is used in the paint and cosmetic industries. Used as a lubricant in applications where extreme heat is required. Used to make roofing material to improve its weather resistance. Used to make cosmetics and antiperspirant.

# Whiting Chalk Powder

We are the supplier of Micro fined Whiting Chalk Powder. We offer Micro fined Quality Whiting Chalk Powder that is processed from excellent quality Whiting Chalk Lumps from different mines around India . The quality of the Whiting Chalk Powder offered by us is up to 600 mess fineness.

## **Used:**

Tubes,Tires,Rubber, Hardware retailers, Chemical Industries, Paint Industries, Wall putty Industries,Ceramic Industries

# Oyster Shell Calcium Carbonate Powder

The material is processed through naturally occurring sea shells of Oyster Origin. Unlike other two grades which are inorganic in nature. Oyster Shell Calcium Carbonate is in its purest form with 99.7 % assay as  $\text{CaCO}_3$ . The material is creamish in colour owing bulk density between 0.6 to 0.8 gms/cc. Its major market is in the pharmaceutical segment due to non toxic and relatively high  $\text{CaCO}_3$  contents.

# Hydrated Lime Powder

**Hydrated Lime** (or calcium hydroxide, or slaked lime) is usually a dry powder resulting from the controlled slaking of quicklime with water. The exothermic or released heat of reaction is captured and used to evaporate the excess slaking water.

## **Details:**

Chemical formula:  **$\text{Ca(OH)}_2$**

Chemical composition of Hydrated Lime available in each grade.

# Quick Lime Lumps (Burnt Lime)

We are reckoned as one of the staggering **Burnt Lime** manufacturers in India. The composition of the burnt lime makes it appear white in color and to meet the requirements of the application, the burnt lime is available in forms of lump & powder. The content burnt lime may vary from 80% to 90%. The burnt lime when reacts with water, it generates heat.

# Yellow Limestone Powder

We have surpassed the competition by processing best in feed grade of Lime Stone Powder. Our offered limestone powder finds its application in various industries including agriculture, feed , paper, plastic, paint, rubber, feeds and construction. The offered powder is widely used for preparation of concrete in order to increase its bonding strength.

Available in varied weight sizes, we are providing this high quality lime stone powder at the best price in the industry.

# Zeolite Powder

Natural volcanic Zeolite is a silicate mineral having a unique interconnecting lattice structure. It's honeycomb framework of consistent diameter interconnecting channels and pores coupled with negatively charged alumina and neutrally charged silica tetrahedral building process an open three dimensional honeycomb framework that attracts liquids, odor & gases and traps them in its crystalline structure.

# Agriculture Gypsum Powder

We are renowned firm processing finest grade **Calcium Sulphate**. We have gained specialization in presenting the scientifically formulated range of calcium sulphate which is the most widely used laboratory chemicals and finds its applications in varied industries as a desiccant and coagulant. Carefully formulated with keeping the molar mass and melting point in mind our offered calcium sulphate belongs to the top grades of the product available in the marketplace.

# Black Gypsum Granules

We are a well known firm in Rajasthan producing finest grade Gypsum Granules. We have gained expertise in offering a scientifically formulated range of Gypsum Granules which are most widely used in Agriculture Sector. Gypsum looses the tightness of the soil and allows water as well as other nutrients to penetrate it and reach deeper to the root system of the plants. It helps in reclaiming the saline and alkali soil. It gives good result with a very low input cost.

# China Clay Powder

China clay is ideal for producing pure white ceramics, porcelain, sanitary ware, and china clay pottery due to its high fusion temperature and naturally bright white colour. It is perfect for use in various types of ceramics since it has minimal amounts of iron or alkalis.

## **Application-**

Ceramic, Paints, Rubber, Paper, Cosmetics, Pharma, Textile etc.

# Sodium Bentonite Powder

We are the leading firm of **Bentonite Powder** To sustain the quality, our products are made under the guidance of industry certified professionals. In addition, we present this product at nominal prices.

## **Other Details:**

Price Range:2000-2500 Metric Ton

# Industrial Salt

Being a client-centric organization, we are engaged in offering superior quality Free Flow salt. Our vendors manufacture this product by using an elaborate refinement and blending procedure. Provided salt is formulated with the utilization of supreme quality processing machines by dexterous professionals. Features: High Solubility Good

# Micro Silica Fume Powder

Certainly! Silica fume, also known as microsilica, is an ultrafine powder collected as a by-product of silicon and ferrosilicon alloy production. Here are some of its.

## **Applications –**

Construction Industry

Water Conservancy and Hydropower Projects Industrial and Civil Construction

Ports and Bridges

Saltwater Projects

# Industrial Colour Salt Granules

We manufacture and supply the best quality and bright Colored Salt Granules. It comes in 3 variety of colors. Available with us in different grades and specifications, our product has no match in the market. Being a client centric firm, we also provide our product in tailored packaging options. Buyers are free to place orders and can assume timely deliveries of the same.

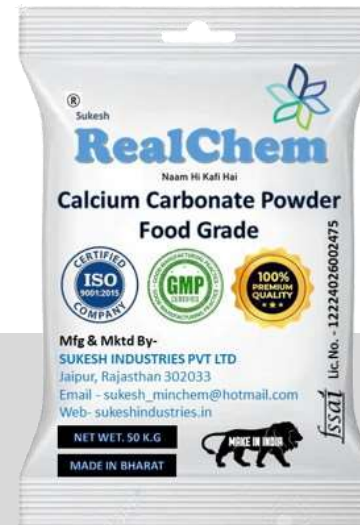

## Team Work

"Gone are the days of the leader who knows it all and who tells his/ her team what to do. If you really want to be innovative, facilitating teamwork and learning is key. That's what researcher found after studying the role of leadership in team learning. 'A leader can never know more than the team' "
